**CERTIFICATION STANDARDS**  
**CREeping BENTGRASS**  
*(Agrostis stolonifera var. palustris)*  
 Revised February 10, 2009

**Certification Standards:** The general standards for seed certification found in the Oregon Seed Certification Service (OSCS) Handbook are basic to all crops, and together with the following specific regulations constitute the certified Creeping Bentgrass standards.

**Varieties Certified:** Varieties and classes eligible for planting may be found in the OSCS Handbook. These standards do not include Penncross Creeping Bentgrass.

**Field History:** Land must not have grown or been seeded to any *Agrostis* species for five years, unless previous crop was of the same variety, class and certified. Creeping bentgrass must be planted in distinct rows. Exceptions must be approved by the Seed Certification Office prior to planting.

**Field Inspections:** Include a seedling and a seed crop inspection. The seedling application must be submitted within 60 days of planting, and a seed crop application must be submitted by April 15 of each year in which seed is produced. Fields of Pennlinks, Penneagle, Penn A-1, Penn A-2, Penn A-4, Penn G-1, Penn G-2, Penn G-6 and Seaside II are limited to 5 seed crops following the establishment year.
