

**Certification Standards:** The general standards for seed certification found in the Oregon Seed Certification Service (OSCS) Handbook are basic to all crops, and together with the following specific regulations constitute the certified Fine Fescue standards.

**Varieties Certified:** Varieties and classes eligible for planting may be found in the OSCS Handbook. These standards include Chewings, Annual, Red, Sheep, Blue and Hard Fescues.

**Field History:** To be eligible to produce Foundation seed, land must not have grown or been seeded to any of these species during the previous five years. Land must not have grown or been seeded to these grasses during the previous 18 months to produce Registered or Certified seed unless the previous crop was of the same variety and class, and certified. Fine fescue must be planted in distinct rows. Exceptions must be approved by the Seed Certification Office prior to planting.

**Field Inspections:** Include a seedling and a seed crop inspection. The seedling application must be submitted within 60 days of planting, and a seed crop application must be submitted by April 15 of each year in which seed is produced.

**Field Standards:**

Class of seed produced	Maximum permitted Other Varieties <sup>1</sup>	Isolation Requirements <sup>2</sup>	
		Less than 5 acres	More than 5 acres
Foundation	None	900 ft.	900 ft.
Registered	0.5%	660 ft.	300 ft.
Certified	1.0%	330 ft.	165 ft.

**Seed Standards:** (Minimum Sample Size – 1/2 Pound)

Factor	Foundation (White tag)	Registered (Purple tag)	Certified (Blue tag)
Pure seed, minimum	98.00%	98.00%	97.00%
Other crops <sup>3</sup> , maximum	0.10%	0.10%	0.25%
Inert matter, maximum	2.00%	2.00%	3.00%
Weed seed <sup>4</sup> , maximum	0.10%	0.30%	0.30%
Weed seed, GROUP A <sup>5</sup> , singly or combined	None	15/lb.	15/lb.
Germination	85%	85%	85%
Germination, Wintergreen	80%	80%	80%

<sup>1</sup> Includes off-type plants.

<sup>2</sup> See section IV, D in the OSCS Handbook. Isolation is required between varieties of Fine Fescue, with the following exceptions. Hard, Sheep, and Blue Fescues need not be isolated from Red or Chewings Fescues. No isolation is required at the Certified generation between strong creeping varieties of Red fescue and either slender creeping Red fescue or Chewings varieties with differing chromosome levels, as verified by variety descriptions or special testing. Slender creeping Red fescue varieties include: Count, Dawson, Marker, Rainier, Seabreeze, Seabreeze GT.

<sup>3</sup> See section IX, D3 in the OSCS Handbook.

<sup>4</sup> None of the prohibited weeds listed in section V in the OSCS Handbook, nor St. Johnswort allowed in any class of seed.

<sup>5</sup> GROUP A – Buckhorn plantain, Docks, Sheep sorrel, and Bedstraw.
